

ENABLING TECHNOLOGIES INC
The Supreme Braille Dot Quality!

Humanware™

ETC & Humanware Agreement

Enabling Technologies is pleased to announce a new partnership with Humanware. Beginning January 1st, 2016 Humanware will become our exclusive distributor in North America for all of Enabling Technologies Braille products.

With this exclusive partnership for the US and Canada, the highest quality and most reliable Braille embossers produced by Enabling Technologies will be available through Humanware, thus providing the most complementary line of products for the Blind and visually impaired.

Braille Literacy has always been in the forefront of our mission at Enabling Technologies and Humanware. Whether you prefer hard copy Braille or refreshable Braille, both companies are committed to providing the best tools and products for reading Braille.

Enabling Technologies (www.brailleur.com) is a recognized world leader in producing Braille embossers. We are best known for our incredibly robust Romeo and Juliet embossers as well as production embossers such as Braille BookMaker, Braille Express 150 and BraillePlace. Our product line has recently been updated with new models including the Romeo 60 a new single sided embosser, the Juliet 120 a new double sided (interpoint) embosser and the Phoenix, the world's first multi-function Braille and Tactile Graphics System.

Humanware (www.humanware.com) is the global leader in assistive technologies for people who are blind or have low vision. Humanware offers a wide range of innovative products, including the BrailleNoteR Apex, Victor ReaderR, the unique ProdigyR family of desktop and portable vision and reading systems, and TrekkerR Breeze, the all-in-one handheld talking GPS.

For more information about the Enabling Technologies line of Braille embossers, or any other Humanware products, please contact Humanware at info@humanware.com or 1-800-722-3393.
